

## Editorial

### This IS a One Issue Election and It's NOT the Iraq War

Name all the issues you can think of, now which ones do you think are the most important? If you did not list Border Security then you haven't been paying attention. Border Security and Illegal Aliens are the single MOST IMPORTANT issue of our nation today (Please read article on Home Page). It involves the security of our nation both medically and physically. It involves crime, taxes, lawbreakers, phony stories about lower prices and what language we should speak in the future.

If you can make it by the security, crime and taxes then the possibilities of medical calamity in our nation should wake you up. The next time you go into a fast food restaurant and see what you think are Illegal Aliens working there, then think for a minute. If this person sneezes on your food you might just walk out with Tuberculosis (TB) not just normal TB but a new TB that is resistant to many of our present drugs. As stated in an article by Madeleine Pelter Cosman, Ph.D., Esq. in the Journal of American Physicians and Surgeons,

*“Many illegals who cross our borders have tuberculosis. That disease had largely disappeared from America, thanks to excellent hygiene and powerful modern drugs such as isoniazid and rifampin. TB's swift, deadly return now is lethal for about 60 percent of those infected because of new Multi-Drug Resistant Tuberculosis (MDR-TB). Until recently MDR-TB was endemic to Mexico. This Mycobacterium tuberculosis is resistant to at least two major antitubercular drugs. Ordinary TB usually is cured in six months with four drugs that cost about \$2,000. MDR-TB takes 24 months with many expensive drugs that cost around \$250,000, with toxic side effects. Each illegal with MDR-TB coughs and infects 10 to 30 people, who will not show symptoms immediately. Latent disease explodes later. “*

We need to vote for U.S. and State Representatives and Senators who will do something, regardless of party affiliations.

Cowards, Hypocrites, Phonies and Weak are the best way of describing some of our Senators and State Representatives. In private conversations they will state that you are right, something needs to be done about the Illegal Alien situation, but they are afraid. Oh, not of losing face or being called names, that happens all too often and it seems to roll off their backs like water off of a duck. What they are afraid of is losing BIG MONEY FROM BIG CONTRIBUTORS.

I am what some call an Idealist. To be fair here's the definition of Idealist:

**i·de·al·ist** *n.*

1. One whose conduct is influenced by ideals that often conflict with practical considerations.
2. One who is unrealistic and impractical; a visionary.
3. An artist or writer whose work is imbued with idealism.
4. An adherent of any system of philosophical idealism

**I believe that one should be honest and upfront about their beliefs and should not hide their feelings. I am so much an Idealist that I am not a true Republican or Democrat, I vote for the person, to hell with the party tags. Too many people today go into that voting booth and pull one or the other lever and that is that. I don't care how good the party is, they can and will make mistakes. Too many people will put aside their beliefs for party politics and vote for someone whom they feel is wrong, but the candidate is a member of my party.**

**Closer to home is our own illustrious Senator Richard G Lugar. Here's a man who will NEVER make my list of honest people in politics. He voted for the Kyoto Treaty which would devastate Indiana and against the Immigration Bill, yet many say he's a shoe-in in the upcoming election. I will vote for the Libertarian Candidate for Senate Steve Osborn (LaPorte), it's my way of saying I'm not happy with Lugar.**

**If you want this issue solved in the right manner you need to follow these simple rules:**

- **Ask your candidates for both State Senate and House if they will support the suggested bill listed on this website. If they say "NO" they cannot support it, then you need to vote for someone else regardless. If they are an incumbent then to get their attention you need to vote for the other candidate regardless of their position or just don't vote for that office.**
- **If you vote either party all the time, you need to make up your mind you are going to change the way you look at elections. If you do this, your party, your candidate will respect your vote much more in the future. If either party knows they cannot depend on your loyalty they will start to respect the people a whole lot more. Nothing gets the attention of an office holder then a close election.**

- **Make sure you Vote. This time it's more important than any other time in your life.**
